Simple solutions to complex problems. And with lustrous executive level wood tops, connectivElements utilize a patent pending, self-levelling mechanism. Connections between these ganging conference tables are smooth and sturdy.

Angled splines slide between table edges to level out joins.

Connect tables end to end, end to side or side to side for utmost flexibility. Loose parts store under rectangular tops to keep all necessary components readily on hand. Clamping mechanisms are easily attached and detached underneath tops. Just slide the angled spline into place and clamp.

Legs have adjustable height with a variance of 4".
