# Lira

Lira features laminate or wood veneer vertical surfaces, laminate work surfaces with the option of glass or solid surface at the deal plate, a 1-1/8" thick hardwood leading top and bottom edge with a 3-1/4" solid surface beltline accent. The unique angles of this completely modular design offers clients extra privacy during transactions.

# Ruble

Ruble features clean curvilinear lines, laminate or wood veneer vertical surfaces, laminate work surfaces and 1" solid surface edges. This series blends contemporary lines with modularity and elegance.

# Euro

Euro features simple lines, laminate or wood veneer vertical surfaces, laminate work surfaces, and a generous 5" thick beltline. This design is ideal for the clients focusing on simplicity and value.

# Schilling

Schilling features a more traditional look with a picture frame trim around the center panel and fluted columns. It's wood veneer vertical surfaces, laminate work surfaces, optional solid surface deal plate, and 1" solid surface edge accents enhance the beauty of the design, while also allowing for durability. This series is ideal for blending a traditional look with modular construction. (Shown with birdseye maple veneer panels available as an upcharge)

Franc features laminate or wood veneer vertical surfaces, laminate work surfaces, and 1-1/2" thick solid surface edge accents. Franc's design and elegant lines combine form and function.

# Franc

Novikoff's clients value our flexible modular technology, but many wish to incorporate their own custom design elements as well. Our engineers' creativity and problem-solving skills teamed with our woodworkers' craftsmanship and knowledge allow us to turn a client's ideas, visions and dreams into reality. Novikoff can easily incorporate existing design with our modular craftsmanship and precision engineering to create the ideal tellerline or checkstand to meet the needs of any financial institution.
